### **Reds Are Training 32 Times as Many Technicians as U. S.**

CPYRGHT

Russia will graduate 32 times as many technicians as the United States next year and "something's got to be done about it," Rep. Wright Patman said today.

The Texas Democrat is chairman of a joint congressional economic sub-committee which completed a two-week public inquiry Friday into the problems created by industry's increasing use of automation, or automatic production equipment.

"One of the major problems we uncovered was that Russia is ahead of us on technicians," he told a reporter.

"We will recommend that Congress take prompt action next year to encourage more American youths to train as technicians." (UP)
